

Details:

This app is created using Reactjs and Bootstrap. This app is created for the purpose of making frontend of ITSP. It is Developed by **Sachin Kumar**.

Instruction to run:

Ensure that you have bootstrap-react Install..

Run the Command `npm start` in Command line by going same directory to run the app.

Automatically the link(<http://localhost:3000/>) will open in your default browser which will appear after running your command.

Features:

This app is made by three components namely "Navigation", "Home", "ITSP"

You can see two tabs in Navbar.

In Navigation Components:

Navbar is designed which contains two tabs.

In ITSP components :

A section of some teams has been designed. In this I have used card. You can see each card contains a header, picture, Some Text and a button. (please ignore the content as it is very randomly typed. All cards are the same and contain the same details. and same kind of button) This button has not been made functional.

In Home components:

A section is designed which contains three cards and each card contains random text and image.

In this whole app you can see very attractive effects have been added.
